

Hi my name is Marco Moniz owner of Platinum Collision in Fall River Ma. I'm writing this letter in regards to the labor bills for the autobody association labor reimbursement rate. Please we really need to get this approved and passed as soon as possible. I've been in business now for 15 years and the labor rate has been the same since. The cost of materials and living keeps going up and we're still getting paid the same. I would love to give my employees a pay that they deserve to be able to survive. I also would love one day for my kids to take over my business but the way things are going there will be no autobody in the near future. Please consider on passing this bill and keep the small autobody shops alive and our future alive also. We really need this to pass. Thank you
